THERMOPLASTIC WELDED FITTINGS

Welded flanges and welded couplings provide secure fittings for plastic tanks without the need for gaskets. We use thermoplastic weld-ing to fuse flanged or threaded fittings ina wide range of sizes.

Welded couplings are available in polyethyl-ene and polypropylene. They are available in sizes from 1/2” to 4” in diameter. The 2” and 3” siz-es are reinforced with a steel rim.

Welded flanges are available in polyethylene, polypropylene and PVDF. Sizes vary based on the material but poly-ethylene is available from 1/2” to 30” in diameter. Our flanges are ANSI

NORMALLY RAISED

150# flanges. We normally use raised face

STYLE

flanges and Vanstone style loose backing rings for easy fit-up to your pipes.

We custom fit tanks with the fittings, options and accessories our customers need. Contact us to see how we can help you.
